LNG

New, unique, efficient: The MS LNG Barge

In a time when clean energy becomes more and more important and marine regulations become stricter and stricter, harbours and onshore facilities need to find affordable economic solutions to supply ships and facilities with low emission energy.

Resulting from this scenario Marine Service has developed the worldwide unique LNG barge – equipped with Marine Service’s LNG Fuel Tank Containers (or Type C tanks), gas handling and service containers – all 40 feet ISO types. The customized barge is able to provide services to port stations and moored or anchored ships at any time.

The barge itself is to be towed and provides a pusher bar at the stern for a pusher tug. There are self-propelled versions of the barge available as well.

Marine Service developed an easy to use custody transfer system, using a weighing cell system for the LNG tank containers, which allows easy training of operators on site.

PUSHER BAR

- Installed at stern for barge pushing by tug

SERVICE CONTAINER

- 12 feet container (aux. services)
- Power generation
- Power distribution
- LNG equipment monitoring

BUNKER FLANGE

- Selectable on barge deck (sides/fore/aft)

GAS HANDLING UNIT

- Equipped with LNG liquid, vapor and vent piping, PBU and LNG pump
- Transfer of LNG from barge to tug or other vessel
- Additionally equipped with cargo hose handling cranes

MAIN PARTICULARS OF BUNKER BARGE:

- Length over all: abt. 50 m
- Breadth over all: 15.40 m
- Height (main deck): 3.40 m
- Design draft: abt. 1.30 m
- Displacement: abt. 785 tons

SPUD POLES

- Spud poles providing independent barge fixation during any LNG transfer operation

MARINE SERVICE LNG FUEL TANK CONTAINERS

- 12 double hull stainless steel 40 feet containers (EN 13530-2, App. C 2003, Corr. 1 2007)
- Length: 12.192 m
- Total volume: 43,200 m³
- IMDG container approval
- Type C tank approval (IMO IGC-code)
- Other LNG tanks usable, too

WEIGHING CELL SYSTEM

- Container weights are recorded and reported to/by discharge/loading control unit

Marine Service GmbH

From Hamburg... to the World

Hamburg-based Marine Service GmbH is part of the family owned Dr. Karl-Heinz Krämer Holding (KHK). MS was founded in 1958 as a marine consultancy firm engaged in design and construction of seagoing ships. From the mid 1960's Marine Service has become one of the leading consultants for marine transportation and handling of LNG, LPG and Ethylene. Leveraging its LNG experience, Marine Service is now pioneering LNG as marine fuel solutions

for a wide range of inland waterway craft and seagoing vessels. In the renewable energy sector, Marine Service provides consultancy and project management for offshore wind energy platforms. From initial feasibility studies and Front-End Engineering & Design to delivery of turn-key solutions, Marine Service delivers added value to its clients.

Dipl.-Ing. Karsten Fach,
Managing Director, Marine Service:

"Hamburg is the gate to the world and we are proud to call it home – nevertheless we will be with you wherever you need us to be."

Global Business

US East Coast:
3 LNG carriers
Plan approval & supervision

US Great Lakes:
FEED study LNG conversion

Mexico:
Molten sulphur carrier
Plan approval & supervision

Trinidad and Tobago:
LPG carrier
Plan approval & supervision

Venezuela:
Dredger refurbishment consultancy

Argentina:
Design of hydrographic
research vessel

Algeria:
LNG carriers
Plan approval & supervision

Finland:
4 LNG carriers
Plan approval & supervision

Germany:
LNG Cruise Ships
LNG Ferries
LPG carriers
Plan approval & supervision
Plan approval for North Sea
AC/DC converter platforms

Italy:
LNG FSRU
Plan approval &
supervision
Project management

Russia:
LNG transportation study
LNG consultancy

India:
Petronet, 3 LNG carriers
Plan approval & supervision

Abu Dhabi:
8 LNG carriers
Plan approval & supervision

Kuwait:
Livestock carrier
Plan approval & supervision

China:
Design assistance to a
Chinese shipyard for LNG carriers

Singapore:
Tugs
Plan approval & supervision

Korea:
Supervision for LNG carriers,
LPG carriers and chemical tankers

Japan:
Supervision for LNG carriers

Indonesia:
Plan approval for LNG carrier

Marine Service projects worldwide:

- LNG
- Technical Services
- Commercial Advisory Services
- Offshore Wind Power
